* Only includes tenured and tenure-track faculty, as identified by the tenure status field.

** In 2009, there were 85 faculty (21.8 FTE) previously paid per piece who were put on monthly appointments. In 2010-2012, these faculty were changed to per piece appointments and are not included. In 2013, these adjunct faculty were converted to monthly appointments and are included in these numbers.

Notes:

In Fall 2014, CAHNRS combined appointments that were previously split into instruction, research, and public service to instructional appointments. As a result, there is a slight increase in instructional headcounts and a larger increase in instructional FTE. In order to make the past data more consistent with current practices, the FTE from Scientist and Extension Specialist appointments for tenured and tenure-track faculty were included as instructional for all years.

Instructional faculty includes all faculty with appointment titles associated with job group 21 (instructional), directors/chair titles in academic units, and for tenured and tenure-track faculty it also includes Scientist and Extension Specialist appointments. The job title 'Adjunct Faculty Paid' is included in the lecturer rank. Visiting faculty, non-tenure track directors and a few other titles such as Post-Doc Teaching Associate are not ranked and included in Other. Instructional faculty with multiple instructional appointments that cross categories are counted in the category that designates the highest rank.
