*\*Beginning in 2017, SAT scores were reported using new scoring format.*

*\*Fall 2005 marked several significant changes related to the SAT score. The score was calculated using a "best component" approach, where the best math or verbal score from any combination of tests taken were added to form the composite score. Then, the best of either the highest component SAT score or the highest ACT-to-SAT converted score was used. Also, Fall 2005 marked the first time scholarship money was tied to the SAT score, as well as the first time that students with less than an 860 SAT were denied admission barring special circumstances. This combination of changes makes an accurate retro comparison impossible.*
